Azadirachta indica (Mwarobaini)
Moringa oleifera

TASKS FOR WHICH TO BE USED

A. BIO-DIVERSITY CONSERVATION

1. Identify plants and make corrections and confirmations where necessary
2. Confirm uses, correct dosages and diseases treated
3. Take inventory of plants in the regions where once used
4. Establish local herbaria in county centers
5. Establish best propagation methods
6. Assign conservation tasks and maintain pertinent activities

B. RECOGNITION FOR PRACTITIONERS

1. Create awareness about the procedure for recognition
2. Testing using FAFEG METHOD. Actual medicinal plants are collected and preserved by participants
3. Plants are used for testing knowledge and skills as regards
 - a. Name
 - b. Harvesting
 - c. Processing
 - d. Diseases treated
 - e. Dosages
 - f. Follow-up to ensure cure is achieved
 - g. Charges for full dosages
4. Training for upgrading arranged
5. Agree on payment for certification by TASACCO

C. PROFESSIONAL ETHICS MAINTAINED

1. State what amounts to good ethics and bad ethics in the natural healthcare practice
2. Penalties proposed for each wrong practice and rewards for each excellent action done
